Re: Climax General Store, 1218 N.C. Highway 62 E., Climax, NC

Dear Mr. Fields:

On January 4, 1993 we received the closure assessment report detailing the removal of Underground Storage Tanks (UST) at the referenced location. After review of the assessment we question the accuracy of the soil samples collected at a depth of six feet from underneath the kerosene UST. The UST Closure Inspection revealed numerous holes in the kerosene UST as well as heavily saturated and stained soil.

It is our understanding that this soil was removed by the contractor based on these observations. However, soil samples did not reflect this. It is further our understanding that based on the recommendation of the contractor that the soil remains stockpiled on site.

In order for this site to be closed out by the state we require at this time that additional samples be collected. One sample for every fifty cubic yards will be necessary. This sample should be a composite sample of representative soil from the stockpile. The sample should be analyzed by Methods 5030 and 3550. Once the laboratory results have been received soil disposal should be completed in accordance with the findings of the laboratory results.

If you have any questions please feel free to call me at
(919) 373-7565.

Sincerely,

Kelly C. Gage
